Edinburgh, UK

Experienced front-end developer seeking employment in the web development industry. I am looking for expanding my skills in front end development, ideally Vue.js. Currently taking Vue Mastery courses and working on my Vue site projects. Looking to be a part of knowledge-sharing and open communication technical team.

Key skills:

- Self motivated to develop new skills
- Able to work well individually and in a team
- High attention to details lets me flag the issues/bugs early
- Taking responsibility for my work, I know why I have done things in a certain way
- Respecting different approaches to solving a problem, I want my work to be challenged
- Easily adapting to the new environment and circumstances
- I like and I am good at teaching, training people
- Experience in QA testing, writing and executing UAT scripts
- Business management degree benefits a web developer role, ability to use project management tools, experience in agile and other PA methodologies

I am enjoying my job if I learn, help and get recognised for my hard work. I believe I have comprehensive skills and always like to challenge myself, it is the only way of learning. I am looking for a job where I am not looking forward to a weekend, I enjoy everyday.

Work experience

ABERDEEN STANDARD INVESTMENTS   Mar 2018 - February 2019
Web Developer

Contractor in a global digital marketing team, working on a business digital merge project. Using Agile methodology and constantly reviewing upcoming business needs/issues. Actively working on new features, bugs and QA support for the team.
 Assisting in training and documentation of usaging Sitecore CMS. Dealing with digital requests, campaigns and BAU tasks. Wide communication with internal teams and design/development agencies.

COHAESUS   Oct 2015 - Mar 2018
Web Developer

Front End developer, within a technical delivery agency. The role focussed on implementing web based software solutions to meet the project needs. Multiple projects and sites, working at client's office occasionally.
In addition to this I held the responsibilities of project administration. Dealing directly with clients, both in person and remotely, monitoring projects, managing the Agile production process in close conjunction with designers and the UX production team. Client placements while in Cohaesus: Tesco Bank (6 months), Krow Communications (3months), VML (3 months).

BUPA UK   Sep 2014 - Jun 2015
Digital Content Editor

Creating and editing web pages in Sitecore CMS, updating and optimising Bupa's website to meet the latest requirements. Ensure PDFs are labelled correctly, have appropriate file sizes, and are tagged for accessibility. Work through accessibility and usability issues via Active Standards to ensure the Bupa websites meet appropriate standards of accreditation. Assist with User Acceptance Testing of new projects, comparing developments against requirements.
Tools used in role: Sitecore, Jahia, Photoshop, Adobe Acrobat Professional, Microsoft Office (Outlook, Word, Exel, Power Point), Active Standards, Visual Studio, Trello, HTML, CSS.

Aspers Casino UK   Jun 2012 - Aug 2014
Croupier

Providing customer service, performing technical and functional gaming duties as per the casino regulations. Manage table games and customers data, pay and take bets, exchange cash for tokens and chips.
